VOICE CONTROL YOUR HOME

compatible
with Amazon Alexa
and Google Home

'Hey Alexa', turn on TV
'Hey Alexa', turn on AC
'Hey Alexa', set AC temp. to 16°C

'Ok Google', turn on all lights
'Ok Google', turn on Geyser

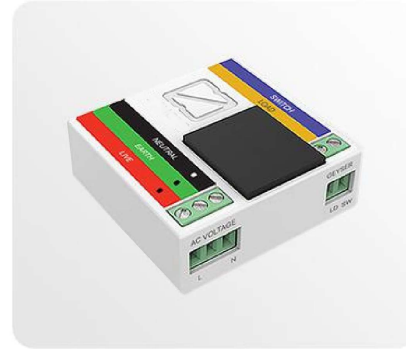

SMART SWITCHES

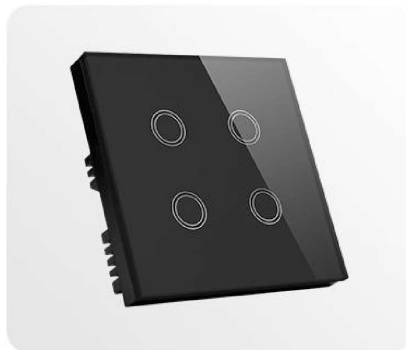

Light Fan Control

Curtain Controller

Heavy Appliance Control

Scene Controller

Dimmable LED Driver

RGB Controller/ LED Strip Dimmer

LIGHT FAN MODULE

This sleek device installs inside your existing switchboard and without any change to your wiring, gives you control of your lights and fans on the App

You can regulate your fan speed and DIM your LED Lights as well

Our fan speed control is 100% humming free

Our Proprietary LED dimming technology ensures flicker-free control

Enabled with our proprietary fails-safe technology to ensure your physical switches always work

Specifications :

Operating Input voltage : 90 - 240V AC

Number of load Channels : 3 lights + 1 Fan or 4 Lights

Maximum per Channel load output : 150 watts

LIGHT MODULE

(2 Channel Dimming)

This module installs behind the switchboard to give you control of your lights on the App

It can be used for Dimming of LED Lights as well

Our Proprietary LED dimming technology ensures flicker-free control

Enabled with our proprietary fails-safe technology to ensure your physical switches always work

Specifications :

Operating Input voltage : 90 - 240V AC

Number of load Channels : 2 Lights

Maximum per Channel load output : 150 watts

LIGHT MODULE

(2/4 Channel Non-Dimming)

This module installs behind the switchboard to give you control of your lights on the App

Supports only ON/OFF of lights and other loads

Available in 2 variants one can control 2 loads and the other 4

Specifications :

Operating Input voltage : 90 - 240V AC

Number of load Channels : 2 Lights / 4 Lights

Maximum per Channel load output : 150 watts

POWER MODULE

This device installs behind the switchboard and gives you control of heavy appliances like Geyser, AC, Water Pump etc.

It measures the Power consumption of appliance connected with it

Enabled with our Proprietary fail-safe technology to ensure your physical switches always work

Specifications :

Operating Input voltage : 90 - 240V AC

Supported Appliances : Geyser, Fridge, AC Main Power

Number of load Channels : 1

Maximum per Channel load output : 3000 watts

CURTAIN CONTROLLER

(2/4 Channel)

This device can be used to control motorized curtains and projector screens

Works in parallel with Physical piono or bell push switches

**It can control curtains of all Orientations
Available in 2 variants, one can control 2 motors and other can control 4**

Specifications :

Operating Input voltage : 90 - 240V AC

Number of load channels : 2 Curtains / 4 Curtains

Maximum per channel load output : 150 Watt

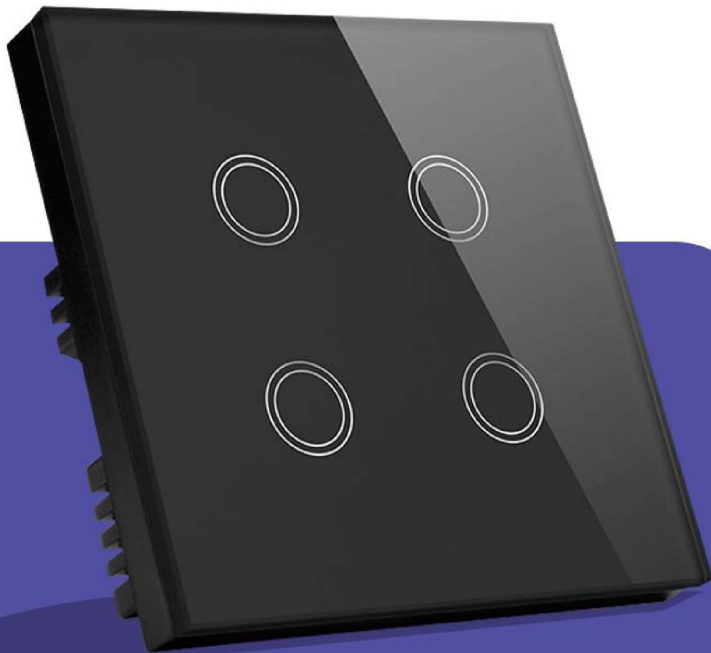

TOUCH SCENE CONTROLLER

4 Channel Touch switch to execute scenes
Scenes can be assigned from the App by the User

Each touch will execute one scene

Specifications :

Operating Input voltage : 230V AC
Fits in a 2 Module Switch Box

DIMMER LED DRIVER

Revolutionary Product for LED dimming

Works with Light Fan Module and Light Module

Smooth dimming when light is turn ON/OFF

Dimming can be controlled from App and Regulator

Supports 15 Levels of Dimming

Specifications :

Can Control LEDs up to 18w

Current Rating of 300mA

works with all LEDs with external Drivers

Operating Input voltage : 220 - 240 VAC

RGB CONTROLLER

This device can be used to the Colour of RGB LED strip lights

Colour can be set from the App

Option to choose from 16 Million Colours

Specifications :

Number of Load Channels : 1

Maximum per Channel Load Output : 150 Watts

12V LED STRIP DIMMER

This device can be used to dim LED strip lights

Dimming can be done from the App

Supports 15 Levels of Dimming

Specifications :

Operating Input voltage : 90 - 240 VAC

Number of Load Channels : 1

Maximum per Channel Load Output : 150 Watts

SMART IR

Mini SUR

SUR

Smart Universal Remote Plus

IR Blaster that supports multiple installation option

Can be Table-Top, Wall-Mount or Ceiling-Mount

Control TV, AC, Set Top Box, Home Theater, Projector and other IR appliances from the App

Full remote of all AC brands, includes ON/OFF, Temperature, Swing and FAN Speed

Integrated program guide of all DTH and Cable Operators

Control 6 Appliances in one room

Smart Universal Remote Pro

IR Blaster that supports multiple installation option

Can be Table-Top, Wall-Mount or Ceiling-Mount

Applications in other rooms can be controlled with a wired connection

4 IR probes are included in the box for wired connections

Supports 6 Wireless plus 4 wired connections

Control TV, AC, Set Top Box, Home Theater, Projector and other IR appliances from the App

Full remote of all AC brands, includes ON/OFF, Temperature, Swing and FAN Speed

Integrated program guide of all DTH and Cable Operators

Smart Universal Remote Wired

IR Controlled that supports Multiple Installation Option

Can be Installed behind switchboard or in any hidden location

Control TV, AC, Set Top Box, Home Theater, Projector and other IR appliance from the App

Full remote of all AC brands, includes ON/OFF, Temperature, Swing and Fan Speed

Integrated Program guide of all DTH and Cable Operators

Control 4 appliances in Multiple Rooms.

Products are easy to install and can be configured from the App

All configuration changes can be done by the user from the app itself

All configuration changes can be done by the user from the app itself

Users can create Scenes, Schedules, Location based rules from the app

Proper use of the scheduling feature will result in power savings

Adding Zemote to your home is not a cost but an investment which will give return in 2 years
